

My decision to PAY for my broadcast radio in my car was MY CHOICE! With that said, the services provided to me by XM should be between my and my chosen broadcast vendor, NOT the NAB. "Commercial" radio as we know it does NOT offer listeners instant, commercial free entertainment and/or public service information. I.e., traffic and weather details. With all due respect to the FCC, please take the initiative to set precedence at the Federal level under the Bush regime and STOP MEDDLING! Tell the NAB to take a hike!! Reject Petition 04-160!

Thank you for your consideration
